

Montgomery & Cannabis Legalization Laws

Following the recent legalization of cannabis by the New Jersey legislature, municipalities like Montgomery Township need to make decisions related to business zoning, regulation, and taxes. The purpose of the meeting is to review the legalization of cannabis in New Jersey, discuss the six different types of State-issued cannabis business licenses, and the process for a town to regulate or prohibit cannabis businesses, impose a tax, etc. Certain non-residential zoning districts will be examined as part of the discussion.
